RESEARCH ASSISTANT WANTED

Needed:

Enthusiastic and detail-oriented person to work part-time in the GeoReef Lab at the University of Sydney in School of Geosciences. The GeoReef Lab is part of the growing Geocoastal Research Group within the school. You will work as part of this group under the direction of Dr. Jody Webster and his group on several funded ongoing research projects in the Great Barrier Reef, Tahiti, Hawaii, Papua New Guinea and Seychelles.

Desirable skills and qualities include: attention to detail, basic lab and sample experience, knowledge and basic skills with Microsoft Office (e.g., Excel) and ARCGIS, and the desire and ability to learn new skills and software used in Sedimentology and Stratigraphy, Marine Geology and Geophysics and Paleoclimatology.

Details and duties to include:

- Following a brief trial period ~$30 per hour (Step 1 RA) (10-20 hours/week - negotiable) depending on existing skills and experience.
- General laboratory work, sample preparation & analysis (curation, rock cutting thin section, SEM, etc).
- Data entry and analysis
- ARC GIS support
- Assist with processing and analysis of Marine Geology and Geophysical data (seismic and 3D visualization software)
- Other general administrative duties to assist the “GeoReef” group
